END TURN

This is a cute game, with a nice bit of thought required and some strategy to boot. Well rounded gameplay with a lot of upgrade combinations to experiment with and perfect will keep this game replayable.

Well worth the money!. Worth the price.

I'd definitely recommend this game to people who are fond of mysteries, witches and pretty games! The characters are adorable and well-defined and the puzzles are clever and original.

While entirely different from Trick & Treat, I was happy to find out more about Charlotte and Marilyn as well as the world they are part of. I was also pleasantly surprised by how much the dev(s) has grown since their first game. A few typos here and there, but nothing big enough to create a linguistic barrier.. Controls are terrible, gameplay is meh, and the overall sound, art, and design of the game sucks. Definitely not worth any money, and worth even less time.. No. No. No. No. No. NO. This is untested, rushed-out buggy trash. When you can actually get the game to not crash to the desktop, the bikes don't handle nicely at all either. Complete trash.. Ehh, Its ok, i guess

if you like soccer.... Successfully made a simple song within an hour for absolute beginner like me. Worth every penny. Yet more Bridge Constructor, Stunts stretches the already somewhat thin premise about as far as it can go.

The key problem here is that Stunts is as much a game of skill as it is bridge building, as many of the levels require your control of the vehicle is precise to get through. The dual-requirement for the game doesn't play out well, and makes the game less "fun" than it might have been.

As such, it compares poorly with other bridge constructor games in the series. It's not possible to recommend this over those.. Takes a little getting used to the interface but I'm able to create my animations fairly easily with little effort. Am well pleased with my purchase.. Hands down the absolute best economic strategy game out there. I've never seen a game so deep. The economy actually reacts to how you play as well. Very well designed.

I loved the game, but could use some more maps and powerups<3. The game is a perfect example of the risk associated with Early access. Devs took everybodys money and ran off with it. No updates or communication in over a year. Sadly, a really interesting concept gone to complete waste. DO NOT BUY!. classic zuma. worth the \$5 if you used to play it.. I like this game. It's simple, but has a style.

It's best to play at night. Because it's so relaxing and meditative game.. This is my favorite game. Everyday I wake up and play Tower of Lust. I'm locked in Skrek's basement no seriously help he's outside my fdoor dnfosdp;ln vkl.jd,BCN<Fva.k,jd.krjm ,ldr.m/lg,A/sID:. I am only a few hours in, but I enjoy this game. There are some points where I can't figure out what to do next, which can be frustrating. However, the game is fun, the mechanics all work well, and the story is nice, if a little average.

It feels a lot like an old-school top down RPG from the 90s.. A young woman suffers a trauma in the death of her father, she then battles her inner doubts and fears (spawning as enemies) using psychological tools and triggers as weapons (those are the skills you choose as you level up). Kind of innovative and poetic and I wish I could recommend it, but it is hard to do so because of all the bugs and crashes. Try the demo first and only get this on a sale and if you are very patient.. Played this game on the original xbox and it was absolutely amazing being able to run around on split screen with my brother or co-oping with my friends and the campaign is just amazing great story and very well done for such an old game, this game was a favorite of mine back then and its still a huge favorite now, granted im a little upset to see the whole coop aspect of the game has been removed for this version but the multiplayer makes up for that with the few people that still play this game the community is still friendly and fun to play with, i would 100% reccomend this game for anyone who enjoys classic shooters or someone who just wants to have fun with a few friends on a sniper match or a TDM! my overall rating for this game would be a 8.5/10 just because of the dissapointment i had when i found out there was no coop mode pre-built in (you can get mods to play coop).. It wasn't much fun for me personally but I can see how it appeals to others with it's interesting art style
